LEVEL 07 PROFILE

ARAZVERA TECHNOLOGIES / Private-source Python product engineering

BUYER-ADAPTABLE KITS / INDEPENDENT OF AERON

ENGINEERING PRODUCT FAMILIES

- Supplier Evidence v0.3.0: industry-neutral versioned evidence contracts; supplier discrepancies; tenant-scoped review and approved export; local authenticated FastAPI.
- AI Agent Security v0.2.0: deny-by-default tool policy, budgets, approvals, authenticated API, real allowlisted pure text execution and replay protection.
- Recovery Evidence v0.2.0: trusted operator multi-SQLite snapshots, SHA-256 integrity verification, preflight and isolated restore.

VERIFIABLE ENGINEERING

- 82 local Python tests passed; 71 extracted-module tests passed; four hosted Windows/Ubuntu CI jobs passed.
- Docker nonroot local pilot: two Healthy REST services with synthetic HTTP checks for tenant isolation, approval, custom supplier schema and tool authorization.
- No paid customer acceptance, enterprise SLA or independent regulatory/security certificate claimed.

DELIVERY SCOPE AND CONSTRAINTS

Buyer-specific ERP/tool/database integrations, live SSO and hosting must be agreed as separate technical work with written acceptance and lawful source rights.

Contractor genuinely resident in Iran. Applicable export/sanctions, IP, data and legally permitted payment checks required; customer owns and pays for infrastructure and API.

Asynchronous English written communication ONLY - no voice/video or live spoken interviews.
